In 2009, the company actively implemented the requirements of environmental protection laws and regulations, and further improved the environmental management system, energy saving and emission reduction work, and the ecological environment of the mining area was effectively protected. The company has made remarkable achievements in energy saving and emission reduction, and has been awarded the honorary titles of "Advanced Unit of Energy Saving and Emission Reduction" and "Advanced Unit of Environmental Protection" by the local government.

Information 1: In 2009, China Railway Shanhaiguan Bridge Group Co., Ltd. carried out comprehensive energy-saving and emission-reduction transformation of the boilers, and the annual coal consumption was reduced by more than 5,000 tons. The company has also actively developed and utilized new energy sources, and the proportion of clean energy in the total energy consumption has increased year by year.

Information 2: China Railway No.6 Group Co., Ltd. Shanghai Bridge Engineering Branch Company has built a modern wastewater treatment station, and all the wastewater generated in the production process is recycled after treatment, and the recycling rate reaches more than 95%.

Information 3: Beijing Shidaitong Science and Technology Development Co., Ltd. has established a perfect environmental management system, and has obtained the ISO14001 environmental management system certification. The company has also carried out a series of environmental protection publicity and education activities to enhance the environmental awareness of employees.

Information 4: In 2009, the company invested 66 million yuan in environmental protection facilities and equipment, and carried out a number of environmental protection projects, including dust control, noise reduction, and greening. The "Blue Sky Project", "Clean Water Project", and "Green Mountain Project" have been implemented successively, and the ecological environment of the mining area has been significantly improved. In 2009, the company was awarded the "Advanced Unit of Environmental Protection" by the local government.
